

CODE HUNT

Number of Rounds: 3

Number of persons per team:2

Round 1: Tech Blank

10 to 15 random questions are given to the students based on the latest technologies and their applications. participants should identify the technology. Based on the scores of overall participants attended for first round, participants will be short listed to second round.

Round 2: Scavenger Hunt

A code will be given to them so that they need to decode the code and then a name of the object or thing will be displayed on the screen. The object or thing will be with in the room. They need to find it and click the picture of it. Based on performance participants are selected to second round. (like riddle)

Round 3: Error Hunt and Blind Coding

A code with syntax errors will be given on monitor (note pad). Participants have to correct the errors and have to type the code with monitor switched off. Based on number of errors they corrected and how better they are coded, they will be selected to last round.
